Restorative Dentistry
Composite Filling Materials

**Indications**
- Fillings of class I to V
- Reconstruction of traumatically affected anteriors
- Veneering of discoloured anteriors
- Colour and shape corrections for a better aesthetic appearance
- Locking, splinting of loose anteriors
- Repair of veneers
- Core build-up under crowns
- Suitable for indirect composite inlays

**Characteristics & Benefits**
- Universal for all cavity classes
- Comfortable handling, easy modelling
- Nano-reinforced ceramic particles
- Special resin matrix
- Significantly less free monomers
- Exceptional aesthetics
- High colour stability
- Perfect translucency and colour adaptation
- Durable, long-lasting restorations
- Outstanding adhesion to tooth substance
- Perfect permanent marginal tightness
- Extremely low polymerisation shrinkage
- Optimal abrasion resistance

**Presentation**
- Item No. 2820: SET: 7 x 4 g syringes (shades A1, A2, A3, A3.5, B2, OA2, BL), 4 ml Compobond 1, 5 ml Cica, shade guide, accessories
- Item No. 2821: 4 g syringe, shade A1
- Item No. 2822: 4 g syringe, shade A2
- Item No. 2823: 4 g syringe, shade A3
- Item No. 2824: 4 g syringe, shade A3.5
- Item No. 2825: 4 g syringe, shade B2
- Item No. 2826: 4 g syringe, shade OA2
- Item No. 2827: 4 g syringe, shade BL

---

**Indications**
- Fillings with minimally invasive preparation technique
- Fillings of small cavities and extended fissure sealing
- Blocking out of undercuts
- Lining, coating of cavity walls
- Fillings of cavity classes III to V incl. V-shaped defects and cervical caries
- Repair of composite fillings and veneers
- Luting of translucent prosthetic pieces (e.g., full ceramic crowns, porcelain inlays etc.)

**Characteristics & Benefits**
- Nano-reinforced ceramic particles
- Special resin matrix
- Significantly less free monomers
- Perfect translucency and colour adaptation to tooth substance
- High colour stability
- Optimal flowability and thixotropic properties
- Stress-breaking elasticity
- Perfect permanent marginal tightness
- Low polymerisation shrinkage
- Excellent abrasion resistance

**Presentation**
- Item No. 2810: SET: 3 x 1.8 g syringes (shades A1, A2, A3), 5 ml Cica, 4 ml Compobond 1, shade guide, accessories
- Item No. 2811: 1.8 g syringe, shade A1
- Item No. 2812: 1.8 g syringe, shade A2
- Item No. 2813: 1.8 g syringe, shade A3
- Item No. 2681: Application tips, 100 pieces
Restorative Dentistry
Composite Filling Materials

Composan ceram
Glass ceramic micro-hybrid composite

**INDICATIONS**
- Fillings of class I to V
- Reconstruction of traumatically affected anteriors
- Colour and shape corrections for a better aesthetic appearance
- Locking, splitting of loose anteriors
- Extended fissure sealing for molars and premolars
- Repair of veneers
- Core build-up under crowns
- Especially suitable for composite inlays

**CHARACTERISTICS & BENEFITS**
- Suitable for all cavity classes
- Easy and fast application
- Optimal handling
- Excellent adhesion to tooth substance
- Perfect and permanent marginal tightness
- Packable consistency
- Minimal polymerisation shrinkage
- Superior colour stability: no discoloration
- Excellent translucency
- Perfect adaptation to the natural tooth shade
- Polishable to brilliance
- High radiopacity

**PRESENTATION / SYRINGES**
- Item No. 2760:
  SET: 7 x 4 g syringes (shades A2, A3, A3.5, B2, B3, C2, O (opaque)), 4 ml Compobond 1, 5 ml Cica, shade guide, accessories
- Item No. 2761: 4 g syringe, shade A1
- Item No. 2762: 4 g syringe, shade A2
- Item No. 2763: 4 g syringe, shade A3
- Item No. 2764: 4 g syringe, shade A3.5
- Item No. 2766: 4 g syringe, shade B2
- Item No. 2767: 4 g syringe, shade B3
- Item No. 2768: 4 g syringe, shade C2
- Item No. 2770: 4 g syringe, shade O

**PRESENTATION / CAPS**
- Item No. 2710:
  SET: 40 x 0.25 g caps (shades A1, A2, A3, A3.5, B2, B3), 4 ml Compobond 1, shade guide, accessories
- Item No. 2711: 25 x 0.25 g caps, A1
- Item No. 2712: 25 x 0.25 g caps, A2
- Item No. 2713: 25 x 0.25 g caps, A3
- Item No. 2714: 25 x 0.25 g caps, A3.5
- Item No. 2715: 25 x 0.25 g caps, B2
- Item No. 2716: 25 x 0.25 g caps, B3

Composan LCM
Light-curing micro-hybrid composite

**INDICATIONS**
- Fillings of class I, II and V in the posterior area which are not occlusion bearing
- Reconstruction of traumatically affected anteriors
- Facing of discoloured anteriors
- Colour and shape corrections for a better aesthetic appearance
- Locking of loosened anteriors
- Extended fissure sealing for molars and premolars
- Repair of veneers
- Core build-ups for crowns
- Especially suitable for composite inlays

**CHARACTERISTICS & BENEFITS**
- Universal for all cavity classes
- Durable and long-lasting fillings
- Packable consistency
- Sticks to the cavity not to the instrument
- Excellent adhesion to tooth substance
- Superior physical properties
- Perfect aesthetics
- High translucency and perfect colour adaptation
- Polishable to a high gloss

**PRESENTATION / SETS**
- Item No. 2461:
  SET: 7 x 4 g syringes (shades A1, A2, A3, A3.5, B2, B3, I (incisal)), 5 ml Cica, 8 ml Compobond LCM, shade guide, accessories
- Item No. 2474:
  MINI-SET: 2 x 4 g syringes (shades A2, A3), 4 ml Compobond 1, 5 ml Cica, shade guide, accessories
- Item No. 2475:
  SET 2: 7 x 4 g syringes (shades A1, A2, A3, A3.5, B2, B3, I (incisal)), 4 ml Compobond 1, 5 ml Cica, shade guide, accessories

**PRESENTATION / REFFILS**
- Item No. 2462: 4 g syringe, shade A1
- Item No. 2463: 4 g syringe, shade A2
- Item No. 2464: 4 g syringe, shade A3
- Item No. 2465: 4 g syringe, shade A3.5
- Item No. 2466: 4 g syringe, shade B2
- Item No. 2467: 4 g syringe, shade B3
- Item No. 2469: 4 g syringe, shade I
**Composan LCM flow**
Flowable light-curing micro-hybrid composite

**INDICATIONS**
- Fillings with minimally invasive preparation technique
- Fillings of small cavities and extended fissure sealing
- Substitute fillings of cavities with undercuts
- Fillings of class III to V incl. V-shaped defects and cervical caries
- Repair of fillings and veneers
- Luting of translucent prosthetic pieces

**CHARACTERISTICS & BENEFITS**
- Ideal flowability
- Perfect surface wetting
- Thixotropic properties
- Excellent physical properties
- High translucency
- Perfect polishability

**PRESENTATION**
- Item No. 2678: 3 g syringe, A2
- Item No. 2679: 3 g syringe, A3
- Item No. 2680: 3 g syringe, A3.5
  → 3 g syringes incl. 15 application tips
- Item No. 2681: application tips, 100 pieces

---

**Composan glass**
Light-curing compomer

**INDICATIONS**
- Fillings of deciduous teeth
- Class III and V fillings
- Facetting of discoloured anteriors
- Temporary fillings of class I and II
- Extended fissure sealing

**CHARACTERISTICS & BENEFITS**
- Continuous fluoride release
- Excellent adhesion to dentine / enamel
- Combines the advantages of glass ionomer cements and composites
- High compressive and transverse strength
- Perfect modelling and polishing
- High colour stability
- Good translucency

**PRESENTATION**
- Item No. 2690: SET: 40 x 0.25 g caps (shades 5 x A2, 10 x A3, 5 x A3.5, 10 x A4, 5 x B3, 5 x C2), 8 ml Compobond NE, shade guide, accessories
- Item No. 2691: 25 x 0.25 g caps, A2
- Item No. 2692: 25 x 0.25 g caps, A3
- Item No. 2693: 25 x 0.25 g caps, A3.5
- Item No. 2694: 25 x 0.25 g caps, A4
- Item No. 2695: 25 x 0.25 g caps, B3
- Item No. 2696: 25 x 0.25 g caps, C2

---

**Composan glitter**
Coloured compomer with glitter effect

**INDICATIONS**
- Fillings of deciduous teeth

**CHARACTERISTICS & BENEFITS**
- 6 attractive glittering colours
- No etching, no rinsing, no drying
- Perfect polishability to high brilliance
- Excellent physical properties
- Continuous fluoride release
- Colour guide with original material

**PRESENTATION**
- Item No. 2780: SET: 40 x 0.25 g caps (colours 10 x pink, 10 x blue, 5 x gold, 5 x green, 5 x lemon, 5 x orange), 8 ml Compobond NE, colour guide, accessories
- Item No. 2781: 25 x 0.25 g caps gold
- Item No. 2782: 25 x 0.25 g caps blue
- Item No. 2783: 25 x 0.25 g caps pink
- Item No. 2784: 25 x 0.25 g caps green
- Item No. 2785: 25 x 0.25 g caps orange
- Item No. 2786: 25 x 0.25 g caps lemon

---

**Restorative Dentistry**
Composite Filling Materials / Compomer Filling Materials
**Restorative Dentistry**

**Glass Ionomer Filling Cements**

**Medifil / Medifil aqua**
Glass ionomer filling cements for classes I, III and IV

**INDICATIONS**
- Restorations of deciduous teeth (especially class I)
- Repair of V-shaped defects and enamel as well as root erosions in the dental neck area incl. class V fillings
- Treatment of cavities caused by carious lesions
- Fillings of class III and small fillings of class I
- Build-up fillings under crowns
- Cavity linings
- Extended fissure sealing

**CHARACTERISTICS & BENEFITS**
- Excellent biocompatibility, low acidity
- High compressive strength
- Stable and abrasion resistant
- Tooth-like thermal expansion
- No temperature rise during setting
- Continuous high fluoride release
- Enamel-like translucency
- Excellent radiopacity

Additionally for Medifil aqua:
- Anhydrous – simply miscible with water
- No mixing errors
- No risk of overacidification

**PRESENTATION MEDIFIL**
- Item No. 2601: SET: 3 x 15 g powder (shades A1, A2, A3), 10 ml liquid, 3 ml Copal Varnish LC, shade guide, accessories
- Item No. 2602: 15 g powder A1, 10 ml liquid
- Item No. 2606: 15 g powder A2, 10 ml liquid
- Item No. 2603: 15 g powder A3, 10 ml liquid

**PRESENTATION MEDIFIL AQUA**
- Item No. 2611: SET: 3 x 15 g powder (shades A1, A2, A3), 3 ml Copal Varnish LC, shade guide, accessories
- Item No. 2612: 15 g powder A1, dropper bottle
- Item No. 2615: 15 g powder A2, dropper bottle
- Item No. 2613: 15 g powder A3, dropper bottle

**Medifil IX**
Packable glass ionomer filling cement

**INDICATIONS**
- Treatment of V-shaped defects and enamel or root erosions in the dental neck area incl. class V fillings
- Restorations of deciduous teeth (especially class I)
- Cavity fillings of class II (not occlusion bearing) by means of tunnel preparation
- Core build-ups, build-up fillings and linings
- Temporary long-term treatment of class I and II cavities

**CHARACTERISTICS & BENEFITS**
- Excellent packable consistency
- Strong adhesion to dentine and enamel
- High compressive and flexural strength
- Tooth-like thermal expansion
- Superior abrasion resistance
- Moisture tolerant
- Continuous high fluoride release
- Highly biocompatible (does not contain mercury or resin)
- Highly translucent and radiopaque
- Fast and easy direct application without mixing errors

**PRESENTATION**
- Item No. 2624: SET: 48 application capsules (shades A1, A2, A3), 3 ml Copal Varnish LC, shade guide, accessories
- Item No. 2625: 48 capsules, shade A1
- Item No. 2617: 48 capsules, shade A2
- Item No. 2626: 48 capsules, shade A3
Medifil silver
Anhydrous silver containing glass ionomer cement

**INDICATIONS**
- Restorations of deciduous teeth (especially class I)
- Cavity fillings with carious lesions
- Build-up fillings, core build-ups and linings

**CHARACTERISTICS & BENEFITS**
- Easily miscible with water: no risk of overacidification
- Self-adhesion to tooth substance
- Increased abrasion resistance
- Excellent compressive and tensile strength
- High biocompatibility

---

Copal Varnish LC
Light-curing protective varnish for glass ionomer cements

**INDICATIONS**
- Protection of glass ionomer surfaces against humidity and dehydration immediately after placing the filling
- Sealing and smoothing of glass ionomer surfaces after polishing
- Sealing of the cervical margins of cementations immediately after removal of excess material
- Sealing of linings / build-up fillings before taking impressions

**CHARACTERISTICS & BENEFITS**
- Ready-to-use
- Easy and fast application
- Safe and durable sealing
- Surface smoothing

---

Cica
Etching gel

**INDICATIONS**
- Etching with total-etch technique
  - In case of composite fillings
  - In case of adhesive fixing of Maryland bridges, inlays, brackets and temporary splinting
  - In case of sealing for caries prophylaxis
  - In case of linings to create a fixed bond

**CHARACTERISTICS & BENEFITS**
- Contains 35% phosphoric acid
- Good visibility due to the blue colour
- Thick consistency of the gel for a punctual and exact application
- Syringe for direct application

---

**PRESENTATION**
- **Item No. 2565:** 15 g powder, dropper bottle
- **Item No. 2619:** 3 ml liquid
- **Item No. 2429:** 5 ml syringe etching gel
- **Item No. 2495:** application tips, 30 pieces
Restorative Dentistry
Bonding Materials

**Compobond 1**
Light-curing universal one-component bonding

**INDICATIONS**
- Direct restorations of all filling classes with light-curing restorative materials in total-etch technique

**PRESENTATION**
- Item No. 2490: SET: 4 ml liquid, 5 ml Cica, accessories
- Item No. 2676: 4 ml liquid

**CHARACTERISTICS & BENEFITS**
- Stick-immediately-effect
- One-component – one application
- Excellent adhesion
- Perfect physical properties
- Wet-bonding technique

**Compobond NE**
Light-curing non-etch bonding system with nano-fillers

**INDICATIONS**
- Universal bonding agent for direct restorations with light-curing filling materials for all cavity classes

**PRESENTATION**
- Item No. 2568: SET: 4 ml liquid A, 4 ml liquid B, accessories

**CHARACTERISTICS & BENEFITS**
- Reinforced with nano-fillers
- Superior physical properties
- No postoperative sensitivities
- Ideal for the use in pediatric dentistry

**Compobond LCM**
Light-curing universal two-component bonding

**INDICATIONS**
- Bonding agent for direct composite restorations of all classes
- Adhesive luting of workpieces (bridges, onlays, inlays) with resin cement
- For all light-curing, dual-curing and self-curing composites with or without total-etch technique

**PRESENTATION**
- Item No. 2458: SET: 4 ml adhesive, 4 ml primer, 5 ml Cica, accessories

**CHARACTERISTICS & BENEFITS**
- No-mix two-component bonding system
- Wet bonding: tolerance of residual moisture thanks to the hydrophilic primer
- High adhesion to dentine with or without total-etch technique

**Compobond LC**
Light-curing enamel bond

**INDICATIONS**
- Bonding agent between enamel and light-curing composite
- Sealing of marginal leakage

**PRESENTATION**
- Item No. 2415: 3 ml liquid

**CHARACTERISTICS & BENEFITS**
- Fast and easy application
- One-component material
**Aureocem NE**
Self-adhesive, dual-curing composite-based luting system

**INDICATIONS**
- Definite luting of inlays, onlays, crowns and bridges (no Maryland) made of ceramic, zirconia, composite and/or metal
- Definite luting of fibre-reinforced metal and ceramic posts

**CHARACTERISTICS & BENEFITS**
- Suitable for all material classes
- No etching / no bonding – short processing time
- Short intraoral setting time
- Fast and easy cementation of endodontic posts
- Application directly into the root canal with intraoral tips
- Dual-curing for flexibility and safety
- Permanent seal – very low water solubility
- High abrasion resistance and stability
- Bubble-free mixing
- Extremely low film thickness (<10 µm)
- Odourless

**PRESENTATION**
- Item No. 2705:
  SET: 3 x 5 g auto-mix syringe (shades U, T, WO), mixing tips, intraoral tips
- Item No. 2706: 5 g auto-mix syringe, shade U (universal), mixing tips, intraoral tips
- Item No. 2707: 5 g auto-mix syringe, shade T (transparent), mixing tips, intraoral tips
- Item No. 2708: 5 g auto-mix syringe, shade WO (white-opaque), mixing tips, intraoral tips
- Item No. 2703: mixing tips, 50 pieces (tapered cannulae)
- Item No. 2704: mixing tips, 50 pieces (blunt cannulae)
- Item No. 2799: intraoral tips (for 2704), 50 pieces

**Aureocem DC**
Dual-curing resin-based luting cement

**INDICATIONS**
- Luting of non-metal or metal inlays, onlays, veneers, crowns, bridges and adhesive bridges (Maryland bridges)

**CHARACTERISTICS & BENEFITS**
- Very high adhesion to dentine, enamel and metals
- Very low film thickness (<10 µm)
- High abrasion resistance
- Complete polymerisation
- Permanent seal: no water solubility
- High elasticity: stress absorbing
- Highly radiopaque
- High colour stability

**PRESENTATION**
- Item No. 2685:
  SET: 10 g auto-mix syringe shade U, 8 ml Compobond LCM (4 ml primer + 4 ml adhesive), 5 ml Cica, 5 ml Ceramic primer, accessories
- Item No. 2686: 10 g auto-mix syringe shade U, 8 ml Compobond LCM (4 ml primer + 4 ml adhesive), 5 ml Cica, 5 ml Ceramic primer, accessories, 10 ml Cica, 10 ml Ceramic primer, accessories
Restorative Dentistry
Luting Materials / Additional Products

Medicem / Medicem aqua
Glass ionomer luting cement

INDICATIONS
- Attachment of crowns, bridges, inlays, onlays, posts and orthodontic bands

CHARACTERISTICS & BENEFITS
- No temperature rise during setting
- Highly biocompatible, low acidity
- Micro-fine film thickness for occlusal accuracy
- Excellent adhesion to dentine and enamel
- High compressive strength and low solubility

Additionally for Medicem aqua:
- Anhydrous – easily miscible with water
- No risk of overacidification
- Good flowability

PRESENTATION MEDICEM
Item No. 2438: 35 g powder, 15 ml liquid
Item No. 2451: 15 g powder, 7 ml liquid

PRESENTATION MEDICEM AQUA
Item No. 2447: 35 g powder with dropper bottle

Ceramic repair
Material for chairside repairs of damaged ceramic workpieces

INDICATIONS
- Intraoral repairs of defects in ceramic or composite veneers, fixed prosthetic work with metal frames

CHARACTERISTICS & BENEFITS
- Permanent, aesthetic repairs
- Easy and time saving application
- No removal or recementation of crowns and bridges, no necessity of impressions
- No use of (mutagenic) hydrofluoric acid
- Durable, gap-free compound between ceramic, metal and composite
- High shear bonding strength

PRESENTATION
Item No. 2546:
SET: 8 x 0.3 ml silane, 1.2 g syringe
Opaquer LC, 4 ml Ceramic repair adhesive,
3 x 4 g Composan LCM (A2, A3, A3.5),
8 grinding burs, accessories
**Provilat**
Temporary eugenol-free luting cement

**INDICATIONS**
- Temporary attachments of crowns, bridges and inlays
- Temporary sealings of small one-surface cavities

**CHARACTERISTICS & BENEFITS**
- Eugenol-free thus low allergy potential
- Suitable for the use with composite material
- Pulp protection: contains calcium hydroxide
- Safe adhesion and elasticity
- Easy removal by cooling with ice spray

**Success CD**
Temporary crown and bridge material

**INDICATIONS**
- Production of temporary crowns, bridges, inlays and onlays

**CHARACTERISTICS & BENEFITS**
- Temporary restorations in less than 5 min.
- Auto-mixing, homogeneous and bubble-free consistency
- Extra short mixing tips for an economic and precise application: 40 % less waste
- Very low setting temperature
- Sustains strong functional load
- Excellent transverse and compressive strength
- Natural fluorescence
- Perfect long-term aesthetics: brilliant enamel-like gloss and high colour stability
- Long-lasting temporaries with precise fit

**Provifil**
Light-curing, one-component temporary filling material

**INDICATIONS**
- All kinds of temporary fillings
- Temporary protection in inlay and onlay technique

**CHARACTERISTICS & BENEFITS**
- Easy to model, fast to cure
- Transparent: high depth of curing
- Perfect adhesion
- Slight swelling effect: safe marginal tightness
- Safe seal for several weeks
- High elasticity
- Highly advantageous after root canal treatment
- Uncomplicated removal in one piece
- No damage of the preparation

**PRESENTATION**
- Item No. 2444:
  Paste / Paste System:
  25 g base, 25 g catalyst in tubes

- Item No. 2535:
  Auto-mix syringe:
  5 ml auto-mix syringe, mixing tips

- Item No. 2536:
  brown mixing tips for Provilat auto-mix syringe, 50 pieces

- Item No. 2740: 50 ml cartridge A1
- Item No. 2741: 50 ml cartridge A2
- Item No. 2742: 50 ml cartridge A3
  ➔ all 50 ml cartridges incl. mixing tips

- Item No. 2590: blue mixing tips, 50 pieces

- Item No. 2537: 2 x 4 g syringe

- Item No. 2535:
  brown mixing tips for Provilat auto-mix syringe, 50 pieces

- Item No. 2740: 50 ml cartridge A1
- Item No. 2741: 50 ml cartridge A2
- Item No. 2742: 50 ml cartridge A3
  ➔ all 50 ml cartridges incl. mixing tips

- Item No. 2590: blue mixing tips, 50 pieces
Restorative Dentistry

Lining Materials

Medical
Non-setting calcium hydroxide

INDICATIONS
1. Indirect capping for the treatment of caries profunda
2. Direct capping when the pulp is opened or a pulpotomy is performed
3. Lining of cavities to prevent exposure to acid media when using cements
4. Temporary filling of root canals

CHARACTERISTICS & BENEFITS
1. Ready-to-use in a syringe for direct application
2. Suitable under all lining and filling materials
3. Acid-resistant: effective pulp protection
4. Contains 45% calcium hydroxide
5. Stimulates the pulp and triggers the formation of secondary dentine
6. Antimicrobial effect due to a high pH-value
7. High radiopacity for a better diagnostic control

PRESENTATION
Item No. 2551: 2 ml syringe
Item No. 2495: application tips, 30 pieces

Urbical
Self-curing calcium hydroxide paste / paste system

INDICATIONS
1. Indirect pulp capping
2. Linings under dental filling materials

CHARACTERISTICS & BENEFITS
1. Easy to mix and to apply
2. Sufficient working time and short setting in the mouth
3. Contains 26% calcium hydroxide
4. Activates the formation of secondary dentine
5. Recovering of the pulp – preservation of vitality
6. Bacteriostatic
7. High pH-value: antimicrobial effect
8. Highly radiopaque for a good diagnostic control

PRESENTATION
Item No. 2441: 13 g base
11 g catalyst
Lining Materials

**Restorative Dentistry**

<table>
<thead>
<tr>
<th>Material</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Urbical LC</strong></td>
<td>Light-curing radiopaque calcium hydroxide</td>
</tr>
<tr>
<td><strong>Composeal</strong></td>
<td>Light-curing glass ionomer composite liner</td>
</tr>
<tr>
<td><strong>Medibond</strong></td>
<td>Glass ionomer lining cement</td>
</tr>
</tbody>
</table>

**INDICATIONS**

- **Urbical LC**
  - Indirect pulp capping
  - Linings under all filling materials

- **Composeal**
  - Cavity linings
  - Extended fissure sealing
  - Fillings of small lesions

- **Medibond**
  - Cavity linings
  - Core build-ups

**CHARACTERISTICS & BENEFITS**

- **Urbical LC**
  - Higher compressive strength than conventional calcium hydroxides
  - Excellent adhesion, especially to composites
  - Effective protection of the pulp
  - Acid resistant
  - Radiopaque
  - Ready-to-use: no mixing, no bubbles

- **Composeal**
  - One-component ready-to-use material
  - Excellent adhesion to bonding material and composites
  - High flexural and compressive strength: excellent stability against pressure
  - Acid-resistant
  - Fluoride releasing against secondary caries
  - Universal dentine shade
  - Radiopaque

- **Medibond**
  - No phosphoric acid or monomers
  - Highly biocompatible
  - Self-adhesion to dentine and enamel
  - Dentine-shaded
  - Etchable
  - High compressive strength
  - Tooth-like thermal expansion
  - Continuous, high fluoride release
  - Radiopaque

**PRESENTATION**

- **Urbical LC**
  - Item No. 2493: 2 x 2 ml syringes, 20 application tips

- **Composeal**
  - Item No. 2550: 2 x 2 ml in syringes, 20 application tips

- **Medibond**
  - Item No. 2435: 10 g powder 15 ml liquid
**Fluodica 10 duo plus**  
Fluoride varnish for deep fluoridation against hypersensitivities

**INDICATIONS**
- Treatment of hypersensitivities:
  - in cervical areas and at crown margins
  - after professional cleaning and calculus removal
  - after etching / grinding
  - after injury of the enamel (fractures, chips)
  - caused by worn occlusal surfaces and teeth carrying clasps
- Sealing of cavity margins after restoration
- Dentine protection / lining under amalgam fillings

**CHARACTERISTICS & BENEFITS**
- Highly effective combination of sodium and calcium fluorides
- Transparent: no discolouration of the teeth
- Intensive remineralisation of the enamel
- Free of methacrylate and glutaraldehyde
- Very economic: up to 300 applications per 4 g
- Long-lasting insulation against thermal, chemical and mechanical influences

**PRESENTATION**  
Item No. 2478: 10 g liquid

---

**Fluoraphat pro**  
Dental desensitising varnish with sodium fluoride (5 %)

**INDICATIONS**
- Fast desensitising of hypersensitive dentine
- Sealing of dentinal tubules after cavity preparation
- Sealing of dentinal tubules on sensitive root surfaces

**CHARACTERISTICS & BENEFITS**
- Fast desensitisation
- Fluoride release (5% NaF \( \Delta 22,600 \text{ ppm fluoride} \))
- Protection from acid attacks
- Easy application even on wet surfaces
- Perfect aesthetics: white-transparent tooth colour
- Pleasant melon flavour

**PRESENTATION**  
Item No. 2725: 10 ml tube
  - melon flavour

---

**Composan protect**  
Light-curing desensitising varnish

**INDICATIONS**
- Treatment of hypersensitive dentine
- Treatment of cervical areas
  (incl. crown margins, after tooth cleaning or tartar removal, exposed cervical areas following surgery etc.)

**CHARACTERISTICS & BENEFITS**
- Permanent sealing of tubules
- Significant reduction of stimulus transfer through intensive deep sealing of exposed root dentine
- Triclosan against cariogenic bacteria
- Special filler technology for high abrasion resistance
- Safe adhesion
- Continuous fluoride release
- Easy and economical application

**PRESENTATION**  
Item No. 2424: 4.5 ml varnish
  - accessories
Dental Care
Fissure Sealants / Bleaching

Fisseal
Light-curing pit and fissure sealant with fluorides

INDICATIONS
- Sealing / filling of pits and fissures as well as small cavities
- Sealing / filling of damaged enamel surfaces
- Sealing of carious lesions
- Restorations of small defects in composite and amalgam fillings
- Sealing of deciduous teeth
- Sealing of composite or cement fillings against humidity
- Anchoring orthodontic appliances and covering caries predilection sites during orthodontic treatments

CHARACTERISTICS & BENEFITS
- Direct, fast and economic application
- Excellent flow properties
- Perfect marginal tightness
- White colour for application control
- Continuous fluoride release

Bleach 17
Home-bleaching system for gentle and permanent tooth whitening

INDICATIONS
- Whitening of discoloured vital teeth
- Whitening of discoloured non-vital teeth

CHARACTERISTICS & BENEFITS
- Contains Carbamide Peroxide (≤ 6 % H₂O₂)
- Gentle to tooth substance and restorations
- Simple and user-friendly application
- Treatment of only 2–4 hours per day / night
- Pleasant mint flavour
- Contains fluorides and potassium against hypersensitivities
- Set contains all necessary materials for dentists and patients
- 6 syringes of the bleaching gel are sufficient for bleaching of upper and lower jaw during 12 days

PRESENTATION
Item No. 2472: 2 x 2 ml syringes application tips
Item No. 2637: application tips, 100 pieces

PRESENTATION
Item No. 2776: SET: 6 x 2.4 ml syringes Bleaching gel Contains Carbamide Peroxide (≤ 6 % H₂O₂), 1.2 ml syringe Blocking gel, material for 2 trays, storage box
Item No. 2777: 3 x 2.4 ml syringes Bleaching gel Contains Carbamide Peroxide (≤ 6 % H₂O₂)
### Antipulp
**Paste for devitalisation**

<table>

<tr>
<td>To dam the palatal vibrating line</td>
<td></td>
</tr>
<tr>
<td>In cases of flabby ridges and insufficient adhesion</td>
<td></td>
</tr>
<tr>
<td>To cushion sharp-edged alveolar processes</td>
<td></td>
</tr>
<tr>
<td>To support the healing process in implantology</td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>CHARACTERISTICS &amp; BENEFITS</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Chairside soft relining during 1 appointment only</td>
<td></td>
</tr>
<tr>
<td>Special adhesive for extremely high adhesion between denture and relining material</td>
<td></td>
</tr>
<tr>
<td>Special glazing to seal and to smooth treated surfaces</td>
<td></td>
</tr>
<tr>
<td>Smooth, hydrophobic surface inhibits germ and Candida development</td>
<td></td>
</tr>
<tr>
<td>MMA-free</td>
<td></td>
</tr>
<tr>
<td>Remains permanently soft due to A-silicone basis</td>
<td></td>
</tr>
<tr>
<td>High translucency: natural shade adaptation</td>
<td></td>
</tr>
<tr>
<td>Superior colour stability and excellent aesthetics</td>
<td></td>
</tr>
<tr>
<td>Easy to clean</td>
<td></td>
</tr>
<tr>
<td>Odourless and tasteless</td>
<td></td>
</tr>
</tbody>
</table>

**PRESENTATION**
- Item No. 2580: SET: 50 ml cartridge, 10 ml adhesive, 10 ml glazing base / catalyst, mixing tips, accessories
- Item No. 2738: pink mixing tips, 50 pieces
**Meditray**
Light-curing tray material

**INDICATIONS**
- Fabrication of individual trays for the use in crown, bridge and total-prosthetic technique
- Fabrication of base plates for wax contouring in the total prosthetic technique

**CHARACTERISTICS & BENEFITS**
- Ready-to-use and easy to handle
- High transverse strength
- Cures within 5 min. under halogen light and UVA light
- Pleasant peppermint flavour

**Regibite**
Addition-polymerising silicone material for bite registration

**INDICATIONS**
- Bite registration
- Fixing of face bow registration
- Location material for intraoral pin tracing templates

**CHARACTERISTICS & BENEFITS**
- Thixotropic material
- Dimensionally stable in long-term storage
- No bite disturbance
- Good wetting and reproduction of details
- Tasteless and odourless

---

**PRESENTATION**

**Meditray**
- Item No. 2553: 50 plates for maxillae in pink

---

**Regibite**
- Item No. 2563: 2 x 50 ml cartridge, mixing tips
- Item No. 2798: 50 turquoise mixing tips
- Item No. 2739: 50 intraoral tips
Devices

**Dispenser Type 2**
- Extruder gun for cartridges
- Autoclavable

**PRESENTATION**
- Item No. 2726: Dispenser
- Item No. 2668: GIC Activator

**GIC Activator**
- To activate our GIC application capsules
- High quality metal alloy
- Easy and hygienic handling

**GIC Applicator**
- To apply the content of our application capsules directly into the cavity
- High quality metal alloy
- Easy and hygienic handling

**PRESENTATION**
- Item No. 2673: GIC Applicator
- Item No. 2659: GIC Mixer 230 V

**GIC Mixer**
- Specially designed for our GIC application capsules
- Similar AC types are possible to mix

**Application Tips**

**Presentation**
- Item No. 2495: 30 application tips
- Item No. 2634: 100 application tips
- Item No. 2637: 100 application tips
- Item No. 2681: 100 application tips

**Application Tips**
- Item No. 2637
- Item No. 2681

**Mixing Tips**

**Presentation**
- Item No. 2536: 50 brown mixing tips
- Item No. 2703: 50 mixing tips, tapered canulae
- Item No. 2704: 50 mixing tips, blunt canulae
- Item No. 2590: 50 blue mixing tips
- Item No. 2738: 50 pink mixing tips
- Item No. 2798: 50 turquoise mixing tips

Company

As a manufacturer of high-quality dental material PROMEDICA has a long-standing experience in the dental industry. Founded in Neumünster in Northern Germany, PROMEDICA satisfies the needs of dentists and patients since 1983. Ever since, PROMEDICA has been highly engaged in research and development resulting in a large portfolio which ranges from proven classical products to highly innovative products.

Today PROMEDICA exports to more than 70 countries worldwide and is awarded with the certification of the international standards ISO 13485: 2003 + AC: 2009 guaranteeing production and quality control on the highest level.

Products

PROMEDICA provides solutions for all requirements in restorative dentistry by offering excellent self-, dual- and light- curing composites, first class compomers, modern bonding materials and premium glass ionomer cements. High-quality products for prosthodontia, endodontia and dental care, as well as bleaching products, complete the wide product range containing proven classical preparations as well as progressive products of the latest generation. All products are produced in Germany under highest quality aspects and with the latest technology available.

Service

To our customers, specialist dental suppliers, a high product quality, as well as a relationship based on continuity and reliability is essential for their daily businesses. Having a strong customer focus PROMEDICA is highly committed to consider special demands and to ensure a prompt and careful order processing. Moreover, we guarantee our care and utmost support for the promotion and the sale of our products regarding international marketplaces and exhibitions.
